6.1A Cheque Truncation System (CTS)

CTS - 2010 standard is a set of benchmarks prescribed by RBI towards achieving standardization of cheques issued by banks across the country. This include provision of mandatory minimum-security features on cheque forms like quality of paper, watermark and bank's logo in invisible ink, void pantograph, etc. and standardization of field placements on cheques.

In Cheque Truncation System (CTS), physical movement of cheque is stopped at the collecting bank and only image is transferred to the drawee bank. The drawee bank processes the instrument using the image. In CTS, payments are made by the drawee bank on the basis of the images. In order to ensure quality of the images transmitted for processing at the drawee bank, certain image specifications are mandated by RBI in the CTS clearing. Images that do not meet the specifications are rejected. Apart from the process changes, customers may be guided by a special directive by RBI regarding corrections / alterations on the cheques.

No changes / corrections can be carried out on the cheques (other than for date validation purposes, if required). For any change in the payee's name, courtesy amount (amount in figures) or legal amount (amount in words), fresh cheque leaves should be used by customers.
